Wow, I just paid \$4.00 for a gallon of regular!

Dad promoted our *free pickup and delivery service* because it was good for the environment – that one van servicing a hundred customers eliminated the need for a hundred cars to make one hundred trips back and forth to the cleaners. That's still true, but at 4 bucks and more a gallon personal economics favor driving less. So if you're not already using our *free pickup and delivery* you might want to consider doing so. Of course, if you're a regular counter customer we'll miss seeing you, but once gas prices drop you can always come back.

Now that would make us doubly happy to see you!
