Here she goes again . . .

*First she introduced environmentally friendly GreenEarth™ dry cleaning.
Then the paperless billing system.
Now she wants to take on the plastic.*

Sasha has installed automated systems that, among other things, will reduce the amount of plastic used in bagging by more than 20%. So look for a new look to your orders – fewer garments in a bag, but bags cut to exact lengths resulting in less waste.

Remember –

Don't store garments in the bags, send the plastic back, we're still recycling
